

# ELECTRICAL SAFETY ON THE FARM

---

Each year, Maritime Electric offers Electrical Safety presentations as a service to our community. The presentations promote electrical safety awareness and provide steps that can be taken to prevent accidental electrical contact. They include information on basic facts about electricity, the effect of electrical shocks, safe limits of approach to electrical lines and equipment.

To book a presentation, please contact us at 902-629-3799 or 1-800-670-1012, or email us at [safety@maritimeelectric.com](mailto:safety@maritimeelectric.com).
