OPERATIONS ENGINEER
Operations Support

1. What is your role and how long have you worked at Maritime Electric?

I am the Supervisor, Construction Services and Transmission and Distribution Inspections and I have worked at Maritime Electric for 3.5 years. The Construction Services Department consists of operation support staff and surveyors who do the planning work for the line crews.

2. What has been one of the highlights of your Engineering career to date at Maritime Electric?

The highlight of working at Maritime Electric has been, believe it or not, storms. There is a lot of hustle and bustle and sometimes longer hours, but it is a sense of team work like no other, all departments come together with the common goal to restore power. It transitions from others feeling like your co-workers, to feeling like your work family.

3. Are there opportunities for regular professional development?

I have had continuous support through out my engineering journey at Maritime Electric, there is a great network of engineers who work is almost all departments to lean on and learn from. The Company also supports professional development activities through EngineersPEI and relevant training in the field or for professional growth.

4. Do you work with a team of engineers within the utility?

Yes, my direct supervisor and manager are both engineers that I can turn to with any questions. They are always there to help guide me or teach me new things.

All our energy.
All the time.
